

SUPPLEMENTARY MATERIAL S4

TABLE S4 | Subset of environmental variables correlated (Pearson r) with the standard effect size (ses) of turnover for each stream group. **TRE:** Trees in stream banks; **FRO:** Submerged roots in stream banks; **LIT:** Litter packs on stream bed; **SAN:** Percent cover of sand in the stream bed; **CUR:** Current velocity; **DOX:** Dissolved oxygen concentration; **CON:** Conductivity; **DEP:** Depth; **WID:** Width; **MF_WSHD:** Proportion of mature forest in the watershed; **MF_BUFF:** Proportion of mature forest in the riparian buffer; **EF_WSHD:** Proportion of effective forest in the watershed; **EF_BUFF:** Proportion of effective forest in the riparian buffer; **LUI_WSHD:** Land Use Intensity in the watershed; **LUI_BUFF:** Land Use Intensity in the riparian buffer. **all:** all 75 streams; **ref:** reference streams; **new:** recently deforested streams; **old:** historically deforested streams.
