

TABLE S2 | Samples collected in the upper section of the Lajeado Reservoir between 2010 and 2020. Sampling sites are numbered in the rows (1 to 18), and months are numbered in the columns (1 = January to 12 = December). The number of samples in each combination site/month is indicated inside the table. Ten samples are omitted because they were collected randomly at other localities. In this study, a sample represents a locality within a site sampled for at least for 30 min with controlled effort (*i.e.*, number of fishers and time).

Sites	2010							2011							2012	2014							
	3	5	6	8	9	10	11	2	3	4	5	6	7	8	9	10	3	5	6	8	10	11	12
