SUPPLEMENTARY MATERIAL

TABLE S1 | Table with environmental and spatial characteristics of sampling sites classified according to channelization phases and impact levels of the urban streams surveyed. UPS = upstream; DWS = downstream.

Stream	site	Sampling data	Environmental condition
Coati Chico	S1CC	May 2023 Jan 2024 Dec 2024	site without channelization site without channelization (UPS in Channelization of S2-S3) site without channelization (UPS after Channelization of S2-S3)
Coati Chico	S2CC	May 2023 Jan 2024 Dec 2024	site without channelization site during channelization site after channelization
Coati Chico	S3CC	May 2023 Jan 2024 Dec 2024	site without channelization site during channelization site after channelization
Coati Chico	S4CC	May 2023 Jan 2024 Dec 2024	site without channelization site without channelization (DWS in Channelization of S2-S3) site without channelization (DWS after Channelization of S2-S3)
Coati Chico	S5CC	May 2023 Jan 2024 Dec 2024	site without channelization site without channelization (DWS in Channelization of S2-S3) site without channelization (DWS after Channelization of S2-S3)
Amambay	S1A	May 2023 Jan 2024 Oct 2024	site without channelization site without channelization (UPS in Channelization of S2) site without channelization (UPS after Channelization of S2)
Amambay	S2A	May 2023 Jan 2024 Oct 2024	site without channelization site during channelization site after channelization
Amambay	S3A	May 2023 Jan 2024 Oct 2024	site with channelization in 2018 site with channelization in 2018 site with channelization in 2018
Amambay	S4A	May 2023 Jan 2024 Oct 2024	site without channelization site without channelization (DWS in Channelization of S2-S3) site without channelization (DWS after Channelization of S2-S3)
